- **Career and certification:**

- Director, Division of Plastic surgery, Department of Surgery, National Taiwan University Hospital Hsin-chu Branch
- Director, Center of Human Appearance, Department of Surgery, National Taiwan University Hospital Hsin-Chu Branch

- **Reminder from Dr. Huang:**

1. Craniofacial surgery includes craniofacial trauma, facial fracture, congenital craniofacial deformity and defect reconstruction. The Cranial Center of National Taiwan University Hospital has the best team to give the people the best quality treatment.
2. Hemangioma and vascular malformations are two different diseases

that require experienced physicians and teams to ensure proper diagnosis and treatment.

3. In order to protect the rights and interests of the beauty-loving people, please consult the plastic surgeon certified by the Department of Health and Welfare for cosmetic-related surgery.

4. Hyperbaric oxygen medicine has various indications for clinical medical care. Recently, the National Taiwan University Hospital will restart related medical programs to provide services to the people in need.
