

## Feng-Ping Lu

### • Current position:

- Attending Physician, Department of Geriatrics and Gerontology, National Taiwan University Hospital.

### • Specialty:

- Geriatric medicine
- Internal medicine

### • Education:

- Ph.D., Institute of Health Policy and Management, National Taiwan University.
- M.D., School of Medicine, National Taiwan University.

### • Career and certification:

- Adjunct Assistant Professor, Department of Internal Medicine, National Taiwan University.
- Research fellow, Department of Geriatrics and Gerontology, National Taiwan University Hospital.
- Fellow in Geriatrics medicine, National Health Research Institution.
- Resident, Department of Internal Medicine, National Taiwan University Hospital.

### • Reminder from Dr. Lu:

- Geriatric syndrome commonly seen in older adults is not a normal part of aging. For example, weight loss, recurrent falls, impaired memory, and low

mood could be signals of underlying diseases.  
Early detection and interventions can maintain  
their health and independence.
