- MD, School of Medicine, Taipei Medical University.

• Career and certification:

- Chief Resident, Department of Neurology, National Taiwan University Hospital.
- Resident, Department of Neurology, National Taiwan University Hospital.

• Reminder from Dr. Hsueh:

Neuromuscular disorders are common problems encountered by the general public. The symptoms could be mild such as numbness of the hands and feet, weakness, and soreness, or severe as difficulty in swallowing or breathing. The etiology is quite heterogeneous, and the diagnosis depends on careful

evaluation by specialist. Seek medical advice early with early diagnosis and treatment can have a better life for you.
