### • **Reminder from Dr. Chiang**

In recent years, lung nodules are often accidentally revealed by computed tomography, which is included in many health

checkups.. If it occurs,, you must consult a professional specialist. Don' t be too worried, and it's of paramount importance to seek medical treatment. In the future, the government may further promote more chest computed tomography screening. The increasing screening rate may result in a more frequent diagnosis of lung nodules. please keep our reminders in mind.
