- Pediatric general surgery and endoscopic surgery

• Education:

- MD, School of Medicine, National Taiwan University.

• **Career and certification:**

- Lecturer, Department of Surgery, College of Medicine, National Taiwan University
- Fellow, Department of Surgery, National Taiwan University Hospital
- Attending Physician, Department of Surgery, National Taiwan University Hospital Yun-Lin Branch
- Chief Resident, Department of Surgery, National Taiwan University Hospital

• **Reminder from Dr. Hung:**

Common pediatric surgical diseases include hernia, undescended testis, phimosis, congenital anomaly/malformation, tumor, and

trauma. When encountered, the parents usually concern about the risks, benefits, and necessity of anesthesia and operation most. Comparing to adult surgeon, a professional pediatric surgeon not only is familiar with the delicate operation field and technique on a small body size, but also can provide tailored suggestion and treatment according to the age of patient and the concern of parents. Please consult your pediatric surgeon for further information if needed.
