- Endodontics

• Education:

- DDS, Department of Dentistry, School of Dentistry, National Taiwan University.

• **Career and certification:**

- Chief resident, Department of Dentistry, National Taiwan University Hospital
- Resident, Department of Dentistry, National Taiwan University Hospital

• **Reminder from Dr. Wu:**

Poor oral hygiene often leads to a variety of health issues. The rate of dental caries among our population is higher than the global average, with many severe cases affecting the dental pulp and nerves. This can result in subsequent pain, infection, and even cellulitis. It's important to emphasize that prevention is always better than cure. Along with maintaining good oral hygiene, regular check-ups are crucial. Early detection and treatment can help avoid more complex and costly procedures later on.
