### • **Career and certification:**

- Fellow, Department of Obstetrics & Gynecology, National Taiwan University Hospital.
- Chief Resident, Department of Obstetrics & Gynecology, National Taiwan University Hospital.
- Resident, Department of Obstetrics & Gynecology, National Taiwan University Hospital.

### • **Reminder from Dr. Chen:**

With advances in genomic technology, more preconception and prenatal genetic testing have become available. Genomic sequencing has emerged as a powerful diagnostic tool in prenatal diagnoses of

fetuses with structural anomalies, and in carrier screening of pregnant women and parents-to-be. Selecting the appropriate genetic tests and accurate interpretation and counseling of the results are vital to ensuring the best possible care for patients. As primatologists, we wish to help the family to assess and manage their pregnancies to ensure the best outcomes. We wish all those preparing for pregnancy, as well as new parents, a healthy and joyful journey ahead!
