• Specialty:

- Internal Medicine
- Infectious Disease

• Education:

- MD, School of Medicine, College of Medicine, National Taiwan University

• **Career and certification:**

- Attending Physician, Department of Internal Medicine, National Taiwan University Hospital Jin-Shan Branch.
- Attending Physician, Department of Internal Medicine, National Taiwan University Hospital, Yun-Lin Branch
- Fellow, Department of Internal Medicine, National Taiwan University Hospital.

• **Reminder from Dr. Chen:**

The clinical presentations of infectious diseases include systemic and local symptoms. Given fever is an important indicator for infection, we can measure our temperatures once we feel ill. However, the etiologies of fever and the causing pathogens of infections are diverse. Additionally,

antibiotics are only prescribed for treatment of bacterial infections. When you have fever, please visit your doctor, instead of taking antibiotics by yourselves.
