

Sung-Chuan Chao

• Current position:

- Attending Physician, Department of Traumatology, National Taiwan University Hospital

• Specialty:

- Supermicrosurgical reconstruction, including head and neck, lower extremities and peripheral nerves
- Lymphedema
- Hyperbaric oxygen therapy

• Education:

- Ph.D., Graduate Institute of Toxicology, National Taiwan University
- M.D., Post-Baccalaureate Medicine, Kaohsiung Medical University
- Pharm.D., School of Pharmacy, National Taiwan University

• **Career and certification:**

- Attending Physician, Department of Surgery, National Taiwan University Hospital, Hsin-Chu Branch
- Attending Physician, Department of Surgery, National Taiwan University Hospital, Yun-Lin Branch
- Visiting Fellow, Department of Plastic and Reconstructive Surgery, China Medical University Hospital
- Clinical Fellow, Department of Plastic Surgery, Seoul Asan Medical Center, South Korea.

• **Reminder from Dr. Chao:**

Supermicrosurgery is an advanced technique for treating lymphedema. Lymphedema occurs when lymph fluid cannot circulate properly, causing swelling in the arms or legs. Through supermicrosurgery, doctors can precisely connect damaged lymphatic vessels to small veins under a surgical microscope, re-establishing pathways for lymph fluid flow. This procedure effectively reduces swelling, lowers the risk of infections, and improves the patient's quality of life. If you are experiencing lymphedema, consult a specialist early to explore treatment options. Good health begins with attention to detail!
