• **Reminder from Dr. Chien:**

Healthy gums, healthy smile. Don't forget your gums!

Do your gums bleed when you brush? Feel swollen or tender? Notice bad breath that won't go away? These could be early signs of gum disease (periodontitis). It often starts

silently, but if left untreated, it can lead to loose teeth—or even tooth loss.

The good news is: simple daily care makes a big difference. Brush properly twice a day, floss daily, and visit your dentist regularly for cleanings and checkups. Your gums are the foundation of your smile—let's take care of them, together.
